Sgt. Joe Sturm

Re: Estimation of DNA expenses for HCSD Case # 2017002815, Kimberly Watts

July 19, 2017

Sgt. Sturm,

I have reviewed all of the evidence and current DNA laboratory reports associated with this case. I then spoke with a representative at DNA Labs International in Florida regarding the potential use of the M-Vac system. She also reviewed the current DNA laboratory report. I am suggesting the following for further DNA analysis:

ITEM DESCRIPTION	SCREENING	DNA ANALYSIS	STR MIX ANALYSIS	MVAC	TOTAL
NECK SWAB	\$395	\$795	\$995		\$2,185
KNIFE BLADE	\$395	\$795	\$995		\$2,185
KNIFE HANDLE	\$395	\$795	\$995		\$2,185
FINGERNAIL SCRAPINGS	\$395	\$795	\$995		\$2,185
VICTIM'S JACKET		\$795	\$995	\$995	\$2,785
VICTIM'S SHIRT		\$795	\$995	\$995	\$2,785
VICTIM'S REFERENCE STANDARD		\$595			\$595
THREE SUBJECTS REFERENCE STANDARD (Y-STR)		\$795			\$2,385

TOTAL ESTIMATED COST FOR ANALYSIS \$17,290

The above expenses are estimated on the highest end. The laboratory will begin with the "best" evidence and communicate with me along the way regarding results and continuing processing of evidence. If you have any questions, please don't hesitate to ask.

Thank you,  
Kristi Johnson
